

Souvenir Program
of
The Chime Concerts
with a
Description and Illustration
of the
Chimes and Appliances
installed in
St. Mark's Church Tower

Frankford, Philadelphia

Consecrated, April 25, 1915

On the Great Bell the following inscription
has been engraved :

To the Praise of God and in Loving Memory of

John S. Wilbraham

Born January 15, 1860

Died July 2, 1907

Saint Mark's Day, 1915

Ring in the valiant man and free,
The larger heart, the kindlier hand ;
Ring out the darkness of the land,
Ring in the Christ that is to be.

Chime of Eleven Bells

The Bells are in the key of C by the Founders' Imported Instruments in Concert Pitch, thus:—

C D E F F# G A B^b B C C# D E F

This Chime of Bells has a wide range in playing capacity; in fact, the number of tunes that can be played upon this set of bells is practically UNLIMITED, as there are thousands of tunes within its compass.

These bells are doubly attuned so that the same fullness, tone-richness and brilliancy obtains throughout the entire set. If anything should occur to injure any of the bells, new ones can be promptly made by the Founders to accurately replace them without making any test of the other bells in the tower.

The total net weight of the Bells alone is 18,729 pounds and with the Frame, Mountings and complete Appliances will aggregate nearly 32,000 pounds.

A chime of bells should not be a mere aggregation of so many notes, but in every sense a set of sweet, musical, mellow-toned bells, a pleasure and blessing to the community. Such is the special aim of this foundry in every set of bells manufactured, and their success is universal.

How the Chimes are Erected

The illustration above shows how this Chime is mounted. It is necessary to make a specially constructed frame in each case, depending upon the size and features of tower, but the method of hanging the bells and connecting the Playing Action to the Chiming Console are in all cases alike.

This is the strongest and most substantial method of Chime mounting and playing and the expense of maintaining them in this condition is less than \$10 per year for all time.
